Behzad Razavi's Fundamentals of Microelectronics is a highly useful book to understand the working of diodes, transistors both BJT and MOSFET and amplifiers. It explains very well about small signal and large signal analysis. This is quite a good for Microelectronics which also discusses the practical applications.

A metamaterial (from the Greek word $\mu\eta\tau\alpha$, meta, meaning "beyond") is a material engineered to have a property that is not found in naturally occurring materials. They are made from assemblies of multiple elements fashioned from composite materials such as metals or plastics. The materials are usually arranged in repeating patterns, at scales that are smaller than the wavelengths of the ...
