The ability to recognize oneself in a mirror is an exceedingly rare capacity in the animal kingdom. To date, only humans and great apes have shown convincing evidence of mirror self-recognition. Two dolphins were exposed to reflective surfaces, and both demonstrated responses consistent with the use of the mirror to investigate marked parts of the body.

### **Mirror self-recognition in the bottlenose dolphin: A case**

A doctorate (from Latin docere, "to teach") or doctor's degree (from Latin doctor, "teacher") or doctoral degree (from the ancient formalism licentia docendi) is an academic degree awarded by universities that is, in most countries, a research degree that qualifies the holder to teach at the university level in the degree's field, or to work in a specific profession.

The timeline of historic inventions is a chronological list of particularly important or significant technological inventions and the people who created the inventions.. Note: Dates for inventions are often controversial. Inventions are often invented by several inventors around the same time, or may be invented in an impractical form many years before another inventor improves the invention ...

1. Adversity. In 2013, the United States reached an educational milestone. For the first time, a majority of the country's public school students – 51 percent of them, to be precise – fell below the federal government's threshold for being low income, meaning they were eligible for a free or subsidized school lunch.
