

afs pro 600 monitor pdf

Pros: These radios are packed with new features for scanning, searching, and especially for digital trunking. The 'Multi-Site' feature allows you to monitor only the strongest, consecutive, or all control channel frequencies in the system. The audio is great and setting up a digital system is fairly easy right out of the box.

Trunking systems let a large group of 2-way radio users (or even different groups of 2-way radio users) efficiently use a set of frequencies. Instead of selecting a specific frequency for a transmission, the userâ€™s radio selects a programmed trunking bank in the system when that user presses their PTT (push to talk) button.

The Wide Area Augmentation System (WAAS) is an air navigation aid developed by the Federal Aviation Administration to augment the Global Positioning System (GPS), with the goal of improving its accuracy, integrity, and availability. Essentially, WAAS is intended to enable aircraft to rely on GPS for all phases of flight, including precision approaches to any airport within its coverage area.
