Human Anatomy and Physiology II Laboratory Anatomy of the Urinary System This lab involves the exercise in the lab manual entitled "Anatomy of the Urinary System". In this lab you will look at urinary system histology, and anatomy.

Human Anatomy and Physiology II Laboratory - Class Videos

The urinary system consists of the kidneys, ureters, urinary bladder, and urethra. The kidneys filter the blood to remove wastes and produce urine. The ureters, urinary bladder, and urethra together form the urinary tract, which acts as a plumbing system to drain urine from the kidneys, store it, and then release it during urination.

Urinary System: Anatomy and Physiology with Interactive

Human Anatomy and Physiology is designed for the two-semester anatomy and physiology course taken by life science and allied health students. The textbook follows the scope and sequence of most Human Anatomy and Physiology courses, and its coverage and organization were informed by hundreds of instructors who teach the course.
