The ICAF System is a deluge-type system that uses a balanced piping network and can be activated by electric, pneumatic or manual release. The system can be configured with multiple mixing chambers and can have multiple zones. Each system is designed and installed as per the current NFPA 11 standard.

FireFlexÂ® provides design assistance with respect to piping and nozzle layout, including ...

ICAF SYSTEM - Integrated fire system - Air foam system

The ovens used in the Pizza chains are mostly electrically heated to allow for a standard produced product. so chances of a fire getting hot enough to pop a link on a K rated system will never happen and a K system being used over the oven will do far more damage than good .
