Thermochemistry is the study of the heat energy associated with chemical reactions and/or physical transformations. A reaction may release or absorb energy, and a phase change may do the same, such as in melting and boiling. Thermochemistry focuses on these energy changes, particularly on the system's energy exchange with its surroundings. ...

Thermochemistry - Wikipedia

In spectroscopy and quantum chemistry, the multiplicity of an energy level is defined as $2S+1$, where S is the total spin angular momentum. States with multiplicity 1 ...
