Life Sciences

A bioprocess is a specific process that uses complete living cells or their components (e.g., bacteria, enzymes, chloroplasts) to obtain desired products.. Transport of energy and mass is fundamental to many biological and environmental processes. Areas, from food processing to thermal design of building to biomedical devices to pollution control and global warming, require knowledge of how ...

Journal of Chemical, Environmental and Biological Engineering (JCEBE) is a scholarly open access, peer-reviewed, interdisciplinary journal, it aims to serve as a platform for the dissemination of innovative ideas and research in entire areas of chemical, environmental and biological engineering including physiobiochemical metabolism, thermodynamics and catalysis, molecules and cells, product ...

Journal of Chemical, Environmental and Biological

Paper engineering is a branch of engineering that deals with the usage of physical science (e.g. chemistry and physics) and life sciences (e.g. biology and biochemistry) in conjunction with mathematics as applied to the converting of raw materials into useful paper products and co-products. The field applies various principles in process engineering and unit operations to the manufacture of ...
