So if you think this is just theoretical, theorize again with FACTS. The facts are the Japanese actually DID use two fast Emily 4-engined seaplanes to bomb Pearl Harbor after their first raid. They used uninhabited island lagoons west of Pearl to get smooth water to land on and refuel from submarines.

This post reviews the weird and wonderful world of high altitude wind power. It looks into the reasons for wanting to go high, explains tethered flight and explores the main competing technologies of 1) airborne generation (Google Makani) and 2) ground based generation (KiteGen) and compares their strengths and weaknesses.

### **High Altitude Wind Power Reviewed | Energy Matters**

This paper reports on the implementation of an advanced safety culture in a major oil and gas multi-national. The original proposal came from the company after it had become clear that expectations had been raised after the successful implementation of Health, Safety and Environment (HSE) Management Systems subsequent to the Piper Alpha disaster.
