A (very) Brief History Thermodynamics has its beginnings in the study of engines, particularly steam engines. The word "thermodynamics" was coined by Lord Kelvin in 1849. Rudolf Clausius came up with the term "entropy" in 1850. James Maxwell formulated the Statistical Mechanical branch of thermodynamics in 1871.

### **A Brief Introduction to Thermodynamics**

In a steam engine the combustion of fuel takes place outside the engine and the steam thus formed is used

to run the engine. Thus, it is known as external combustion engine. In the case of internal combustion engine, the combustion of fuel takes place inside the engine cylinder itself.
