Certifications - Training & Certifications - Cisco

A network administrator is the person designated in an organization whose responsibility includes maintaining computer infrastructures with emphasis on networking. Responsibilities may vary between organizations, but on-site servers, software-network interactions as well as network integrity/resilience are the key areas of focus.

Network administrator - Wikipedia

Today, cybersecurity professionals recognize that they can't possibly prevent every breach, but they can substantially reduce risk by quickly identifying and blocking breaches as they happen. Investigating The Cyber Breach: The Digital Forensics Guide for the Network Engineer is the first comprehensive guide to doing just that.
