Sodium triacetoxyborohydride is presented as a general reducing agent for the reductive amination of aldehydes and ketones. Procedures for using this mild and selective reagent have been developed for a wide variety of substrates.

Rank of Keywords of International Conferences on August 9, 2011. LNCS 2011: 37 SIGGRAPH 2012: 32 CRYPTOGRAPHY: 31 ENERGY: 30 AAAI 2012: 28 KDD 2012: 26

### **Rank of Keywords of International Conferences on August 9**

Electrodynamics is the physics of electromagnetic radiation, and electromagnetism is the physical phenomenon associated with the theory of electrodynamics. Electric and magnetic fields obey the properties of superposition. Thus, a field due to any particular particle or time-varying electric or magnetic field contributes to the fields present in the same space due to other causes.

The diversity of solid-state forms that an active pharmaceutical ingredient (API) may attain relies on the repertoire of non-covalent interactions and molecular assemblies, the range of order, and the balance between entropy and enthalpy that defines the free energy landscape.

L'acide désoxyribonucléique ou ADN est une macromolécule biologique présente dans toutes les

cellules ainsi que chez de nombreux virus. L'ADN contient toute l'information génétique, appelée génome, permettant le développement, le fonctionnement et la reproduction des êtres vivants. C'est un acide nucléique, au même titre que l'acide ribonucléique (ARN).
