17. If the engine is equipped with a coolant filter, remove it and blow air into the thermostat housing until no fluid emerges from the filter housing. Install a new non-chemical coolant filter. 18. Remove the rag or tennis ball. 19. Re-attach the bottom radiator hose, clamping it securely. 21. Police the hose connections to assure that they ...

INSTALLATION PROCEDURE â€œ Detroit Diesel Series 60

service the system with coolant. Hose Connections Hose connections should be checked and tightened, as necessary. Hose clamps used on silicone hoses in the cooling system may require tightening at several intervals after initial tightening. This is a normal compression characteristic of new or replacement silicone hoses. Check and re-

Cooling Systems - centralstatesbus.com

Custom designed coolant and heater hoses are engineered to OE specifications and use a variety of reinforcements for heavy- duty pressure connections in hostile engine environments.

Worm Drive Hose Clamps 12 Cooling System â€œ NORMA Group FBS â€œ Springband hose clips to DIN 3021 Because of their design, FBS springband hose clips are particularly suitable for use with hose-spigot connections which are submitted to extreme temperature changes. Once assembled FBS provide a continuously readjusting dynamic tightening effect.

Cooling System - Norma Group

Cooling System Operation Below is an explanation of this system's operation Radiator The radiator is a device designed to dissipate the heat which the coolant has absorbed from the engine. It is constructed to hold a large amount of water in tubes or passages which provide a large area in contact with the atmosphere. It usually

upper radiator hose connection without the vehicleâ€™s engine running. Before the coolant is refilled, a vacuum is applied to the cooling system to eliminate any air in the system. Simply put, this machine is the cleanest, safest, easiest, fastest, most thorough, and most cost-efficient method of radiator fluid exchange ever devised.
