1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

The PMP certification is the global gold standard for project management professionals. Keep abreast of the changes in the project management practices updated in PMBOK guide - 6th edition and pass the PMP® exam on your first attempt with Simplilearn's new PMP course.

### **PMP Certification | PMP Training - Online Course | Simplilearn**

Planning is the process of thinking about the activities required to achieve a desired goal. It involves the creation and maintenance of a plan, such as psychological aspects that require conceptual skills. There are even a couple of tests to measure someone's capability of planning well. As such, planning is a fundamental property of intelligent behavior.
