DOD-STD-2167A (Department of Defense Standard 2167A), titled "Defense Systems Software Development", was a United States defense standard, published on February 29, 1988, which updated the less well known DOD-STD-2167 published 4 June 1985. This document established "uniform requirements for the software development that are applicable throughout the system life cycle."

The US federal government puts together its budget by way of a protracted, ongoing process. As the largest recipient of discretionary federal funds, the Department of Defense adds its own layer of complexity unknown to other smaller departments.

## **How DoD Gets Money: A Primer on the US Federal Budget Process**

The threat of attack from insiders, or an insider causing harm without malicious intent, is real and substantial. To prevent harm to their assets, historically, organizations focused on external-facing security mechanisms, such as firewalls, intrusion detection systems, and electronic building access systems.
