Science Olympiad is an American team competition in which students compete in 23 events pertaining to various scientific disciplines, including earth science, biology, chemistry, physics, and engineering. Over 7,800 middle school and high school teams from 50 U.S. states compete each year. U.S. territories do not compete; however, since 2012 high school teams from Japan have competed at the ...

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

GEMS Teacher's Guides are clearly organized, easy to use, and do not require any special background in

math or science. Each classroom session includes an overview, materials list, and preparation steps, followed by clear, step-by-step instructions for effective classroom presentation.

LHS GEMS Teacher's Guides

Ruthenium is a chemical element with symbol Ru and atomic number 44. It is a rare transition metal belonging to the platinum group of the periodic table. Like the other metals of the platinum group, ruthenium is inert to most other chemicals. Russian-born scientist of Baltic-German ancestry Karl Ernst Claus discovered the element in 1844 at Kazan State University and named it after the Latin ...

This site has many resources that are useful for students and teachers of Chemistry 12 in BC as well as any senior high school Grade 12 chemistry course Canada, the US, or anywhere else in the world.

Chemistry 12

If you are using a science journal to record your child's experiments, then you can have them record either the process of making each type of rock or draw a picture of what they looked like at the end (or both). What's Happening? There are three types of rocks (sedimentary, metamorphic, and igneous) which, given the right conditions, can be changed from one into another.

Momma Owl's Lab: Crayon Rocks

Dapagliflozin (DAP) is a potent and selective sodium-glucose cotransporter-2 inhibitor, for treating type 2 diabetes. DAP propanediol monohydrate (DAP-PDO-H 2 O, 1:1:1) is the solid form used in the current tablet

product to address the severe hygroscopicity problem of DAP free form. DAP-PDO-H₂O, however, suffers the problem of instability when exposed to high temperature, which renders it ...
