A collimator is a device that narrows a beam of particles or waves. To narrow can mean either to cause the directions of motion to become more aligned in a specific direction (i.e., make collimated light or parallel rays), or to cause the spatial cross section of the beam to become smaller (beam limiting device

Collimator - Wikipedia

Education in Norway is mandatory for all children aged 6â€“16.. The school year in Norway runs from mid August to late June the following year. The Christmas holiday from mid December to early January historically divides the Norwegian school year into two terms.Presently, the second term begins in the beginning of January.
