An engineering technologist is a professional trained in certain aspects of development and implementation of a respective area of technology. Engineering technology education is even more "applied" and less theoretical than engineering science education, though in a broad sense both have a focus on practical application. Engineering Technologists often assist professional engineers but after ...

Systems engineering is an interdisciplinary field of engineering and engineering management that focuses on how to design and manage complex systems over their life cycles. At its core, systems engineering utilizes systems thinking principles to organize this body of knowledge. Issues such as requirements engineering, reliability, logistics, coordination of different teams, testing and ...
