Soil erosion is a serious problem arising from agricultural intensification, land degradation and other anthropogenic activities. Assessment of soil erosion is useful in planning and conservation works in a watershed or basin.

Assessment of soil erosion by RUSLE model using remote

1. Introduction. Water is life and its shortage affects the economy of the country. Egypt is one of the water stressed countries. It has large irrigation system but loss of water from the system is a challenging problem for engineers and managers in the country.

Design and analysis of a canal section for minimum water

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.
