This section provides information about lecture topics, lecture notes, and lecture summaries. A significant portion of this course was taught at the blackboard, so the following lecture notes are not intended to fully capture the content of the course. The lecture notes tend to be more detailed in the second half of the course. Lecture summaries are also available for the first half of the course.

I'd agree that a dynamics education is incomplete without learning lagrangian, hamiltonian, and newtonian mechanics. But if you're going to skip any of them, it sure can't be newtonian mechanics, and you always need to start from there.
