2018 Conference Overview: The 14th Annual Device Packaging Conference (DPC 2018) will be held in Fountain Hills, Arizona, on March 5-8, 2018. It is an international event organized by the International Microelectronics Assembly and Packaging Society (IMAPS).

TECHNICAL PROGRAM - IMAPS

The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.

History of mathematics - Wikipedia

Mathematics is a field of study that involves the use of numbers, symbols, and logic to describe and understand the world around us. It is a discipline that has been studied for thousands of years and has led to many of the most important discoveries in science and technology. The history of mathematics is a long and fascinating one, with roots in ancient civilizations such as the Egyptians, Greeks, and Indians. Over time, mathematicians have developed a wide range of theories and techniques, from basic arithmetic to advanced calculus and beyond. The study of mathematics is essential for understanding the natural world and for solving many of the most complex problems in science and engineering.

Illustration of surface precipitation of copper in the absence of effective gettering

An illustration of the phenomenon of surface precipitation of copper in the absence of effective gettering. Here a half-wafer has been contaminated with copper and then heated to 900 degrees C and cooled.
