A diagram is a symbolic representation of information according to some visualization technique. Diagrams have been used since ancient times, but became more prevalent during the Enlightenment. Sometimes, the technique uses a three-dimensional visualization which is then projected onto a two-dimensional surface. The word graph is sometimes used as a synonym for diagram.

(ed note: This article was written in 1979 and is admittedly a little dated. But most of it is still true.) The Third Industrial Revolution is going to create two areas of concern and interest to military planners in the next thirty to fifty years. One of these is new technology that will create new problems of defense and military operations.
