

exponential functions solutions pdf

In this section we will introduce exponential functions. We will be taking a look at some of the basic properties and graphs of exponential functions. We will also discuss what many people consider to be the exponential function, $f(x) = e^x$.

Algebra - Exponential Functions

Section 6-3 : Solving Exponential Equations. Now that we've seen the definitions of exponential and logarithm functions we need to start thinking about how to solve equations involving them.

Exponentiation is a mathematical operation, written as b^n , involving two numbers, the base b and the exponent n . When n is a positive integer, exponentiation corresponds to repeated multiplication of the base: that is, b^n is the product of multiplying n bases: $b^n = \underbrace{b \cdot b \cdot \dots \cdot b}_n$. The exponent is usually shown as a superscript to the right of the base. In that case, b^n is called "b raised to the ...
