G-code (also RS-274), which has many variants, is the common name for the most widely used numerical control (NC) programming language. It is used mainly in computer-aided manufacturing to control automated machine tools. G-code is a language in which people tell computerized machine tools how to make something. The "how" is defined by g-code instructions provided to a machine controller ...

By the way, CNC stands for Computer Numerical Control and has been around since the early 1970's. Earlier it was called NC, for Numerical Control. (In the early 1970's computers were introduced to these controls and hence the name change.) Anyway, while most people have never heard of this term, CNC plays a crucial role in manufacturing process one way or another.
