Chapter 1 Introduction Without control systems there could be no manufacturing, no vehicles, no computers, no regulated environmentâ€™in short, no technology.

Feedback Control Theory - University of Toronto

A control system manages, commands, directs, or regulates the behavior of other devices or systems using control loops. It can range from a single home heating controller using a thermostat controlling a domestic boiler to large Industrial control systems which are used for controlling processes or machines.. For continuously modulated control, a feedback controller is used to automatically ...
