1: 2018.11.11 14:42:03 : Hi! Nice delivery content you have on your site. You know, MOST clients look at your review pages before visiting and ordering at your business.

Shale energy extraction activities in residential areas have the potential to adversely affect human health.

The oil and gas sector is the largest industrial source of volatile organic compounds, which are dangerous because they include hazardous air pollutants, such as the carcinogen benzene; and because they are precursors to ozone, which is also hazardous to health.
