

foundations of aerodynamics kuethe pdf

The Kutta condition is a principle in steady-flow fluid dynamics, especially aerodynamics, that is applicable to solid bodies with sharp corners, such as the trailing edges of airfoils. It is named for German mathematician and aerodynamicist Martin Kutta. Kuethe and Schetzer state the Kutta condition as follows: § 4.11 A body with a sharp trailing edge which is moving through a fluid will ...

Static pressure - Wikipedia

2018. The static pressure is the pressure exerted equally in all directions throughout the fluid. It is the pressure that would be measured by a pressure gauge or a Pitot-static probe. The static pressure is a scalar quantity, and it is the same in all directions at a given point in a fluid. The static pressure is the pressure that would be measured by a pressure gauge or a Pitot-static probe.
