AFMAT – Fracture Mechanics Database. AFMAT – Fracture Mechanics Database is now available for use by AFGROW, Version 5 Users who have been issued a permanent user license keeps the maintenance current. The database contains data for over 600 materials, 1229 sources, and 11 property types (da/dN , da/dt , KIC, a vs. N , etc.).

Hydraulic fracturing (also fracking, fraccing, frac'ing, hydrofracturing or hydrofracking) is a well stimulation technique in which rock is fractured by a pressurized liquid. The process involves the high-pressure injection of 'fracking fluid' (primarily water, containing sand or other proppants suspended with the aid of thickening agents) into a wellbore to create cracks in the deep-rock ...

The stress intensity factor, K , is used in fracture mechanics to predict the stress state ("stress intensity") near the tip of a crack caused by a remote load or residual stresses. It is a theoretical construct usually applied to a homogeneous, linear elastic material and is useful for providing a failure criterion for brittle materials, and is a critical technique in the discipline of damage ...

Dear Colleague, We are pleased to announce the 10th European Solid Mechanics Conference – ESMC 2018, which will be held in Bologna (Italy) during July 2-6, 2018. The Conference is organized by the University of Trento and the University of Bologna. The European Solid Mechanics Conference is the major event for the solids mechanics community in Europe and provides a unique forum for ...

This note provides an introduction to the mechanics of materials and structures. You will be introduced to and become familiar with all relevant physical properties and fundamental laws governing the behavior of materials and structures and you will learn how to solve a variety of problems of interest to civil and environmental engineers.

Fracture patterns can be mapped from the exposure of rock outcrops or man-made excavations (e.g. borehole, quarry, tunnel and roadcut). These geologically-mapped fracture networks were widely used to understand the process of fracture formation, interpret the history of tectonic stresses, and derive the statistics and scaling of fracture populations.

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...

ABSTRACT. The purpose of this work is to show the correlation between the fractal dimension, D , and mechanical properties such as work of fracture, g_w , and fracture toughness, K_{Ic} . Alumina-mullite-zirconia composites were characterized by the slit-island method, SIM, to obtain values of D and its fractional part, D^* .
