In software engineering, a class diagram in the Unified Modeling Language (UML) is a type of static structure diagram that describes the structure of a system by showing the system's classes, their attributes, operations (or methods), and the relationships among objects.. The class diagram is the main building block of object-oriented modeling. It is used for general conceptual modeling of the ...

A control flow diagram (CFD) is a diagram to describe the control flow of a business process, process or review . Control flow diagrams were developed in the 1950s, and are widely used in multiple engineering disciplines. They are one of the classic business process modeling methodologies, along with flow charts, drakon-charts, data flow diagrams, functional flow block diagram, Gantt charts ...

Diffusion is a physical process where molecules of a material move from an area of high concentration (where there are many molecules) to an area of low concentration (where there are fewer molecules).. Diffusion usually happens in a solution in gas or in a liquid.It is possible to see diffusion happening when two liquids are mixed in a transparent container.
