Enthalpy / Ē n Ĩ, Ē™ p i / (listen) is a property of a thermodynamic system. The enthalpy of a system is equal to the system's internal energy plus the product of its pressure and volume. For processes at constant pressure, the heat absorbed or released equals the change in enthalpy.

Enthalpy - Wikipedia

The enthalpy of vaporization, (symbol \hat{H}_{vap}) also known as the (latent) heat of vaporization or heat of evaporation, is the amount of energy that must be added to a liquid substance, to transform a quantity of that substance into a gas. The enthalpy of vaporization is a function of the pressure at which that transformation takes place.. The enthalpy of vaporization is often quoted for the ...

Descrizione. La relazione che lega temperatura, pressione e volume di un gas \tilde{A} descritta in modo semplice dalla legge dei gas. Quando il volume viene aumentato attraverso un processo irreversibile, le leggi dei gas non determinano univocamente cosa accada alla pressione ed alla temperatura del gas.
