New to this Edition. New Problems. There are approximately 35% or about 410 new problems in this edition. These new problems relate to applications in many different fields of engineering. Also, a significant increase in algebraic type problems has been added, so that a generalized solution can be obtained. Additional Fundamental Problems.

-weird notation and variable names: like for work-energy, Hibbeler uses T for kinetic energy for some reason.  
. -The actual principles explained in this edition(you know, the actual statics and dynamics?) haven't changed  
since the previous edition, or the one before that... or the one before that one.
