A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the

elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

The rapidly increasing population, depleting water resources, and climate change resulting in prolonged droughts and floods have rendered drinking water a competitive resource in many parts of the world. The development of cost-effective and stable materials and methods for providing the fresh water in adequate amounts is the need of the water industry.

A Review of Removal of Pollutants from Water/Wastewater

Gwinnett County Public Schools wishes to meet the needs of all of its students and families. If any member of your family needs assistance or has any questions regarding mobility impaired issues or handicapped access, please contact the principal of your local school.
