

### **how to install pulley pdf**

If possible, remove the chain to install the pulleys as it is much easier this way. If installing the pulleys with the chain on, make sure to line the pulleys up properly as the weight of the chain can cause the pulleys to shift and not line up with the bolt hole on the derailleur. Please note, we have 4 different pulleys that have been sold.

INSTALLATION Start at the stationary side of the canopy. On the left or right side of the canopy install a single sheave pulley on the wall or the post in Horizontal direction at the desired level. The pulleys have a joint allowing the pulley to bend 90 degrees up or down on the base. Bend the pulley's head so it points upward.

2. The first thing you need to do is to remove your intake and air filter. By the time pulleys are generally installed, an aftermarket Cold Air Intake has generally already replaced the factory intake. So consult the documentation for your particular intake. Whether it's a JLT, C&L, or even the factory intake, the procedure is generally the same.
