I was planning to change the ATF in my '07 Santa Fe for the first time next month (40,000 miles). Just wondering if the SP-III at a Kia dealership was the same as from a Hyundai dealership.

Honda Civic, quejas a su monoblock - ALVOLANTE.INFO

El nivel de anticongelante en el motor de un Honda Civic XLS 2008 puede bajar por varias razones. Una de ellas es la pérdida de anticongelante a través de un monoblock defectuoso. El monoblock es una pieza que permite la circulación de anticongelante entre el motor y el radiador. Si este se daña, puede haber una fuga de anticongelante, lo que resulta en un nivel bajo. Otra posibilidad es que el anticongelante se haya evaporado debido a un exceso de calor o a un nivel bajo de anticongelante en el radiador. Es importante verificar el nivel de anticongelante regularmente y reemplazarlo si es necesario. Si sospechas que el monoblock es el problema, es recomendable que lo revise un mecánico especializado.
