EMI replaced its Incident Command System (ICS) curricula with courses that meet the requirements specified in the National Incident Management System (NIMS). EMI developed the new courses collaboratively with the National Wildfire Coordinating Group (NWCG), the United States Fire Administration and the United States Department of Agriculture.

This page is intended to serve as an unofficial, working history of the Incident Command System (ICS). Homeland Security Presidential Directive 5 (HSPD-5) and the subsequent release of the National Incident Management System (NIMS) have recently made the Incident Command System (ICS) a household concept among emergency management and incident response personnel in the United States.

In microelectronics, a three-dimensional integrated circuit (3D IC) is an integrated circuit manufactured by stacking silicon wafers or dies and interconnecting them vertically using, for instance, through-silicon vias (TSVs) or Cu-Cu connections, so that they behave as a single device to achieve performance improvements at reduced power and smaller footprint than conventional two dimensional ...

Statistics on rape and other sexual assaults are commonly available in industrialized countries, and are becoming more common throughout the world. Inconsistent definitions of rape, different rates of reporting, recording, prosecution and conviction for rape create controversial statistical disparities, and lead to accusations that many rape statistics are unreliable or misleading.
