American Journal of Applied Mathematics (AJAM) is an interdisciplinary journal containing research articles that treat scientific problems using methods that are of mathematical interest. Appropriate subject areas include the physical, engineering, financial, and life sciences. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of ...

Rheology (/ r i Ę• Ę^ Ę' l Ę™ d Ę' i /; from Greek áĵŕĭ-%o rhĂ©Ă•, "flow" and -ĭ»oĭŕĭĭ±, -logia, "study of") is the study of the flow of matter, primarily in a liquid state, but also as "soft solids" or solids under conditions in which they respond with plastic flow rather than deforming elastically in response to an applied force. It is a branch of physics which deals with the deformation and ...

Four on-lattice and six off-lattice models for active matter are studied numerically, showing that in contact with a wall, they display universal wetting transitions between three distinctive phases.

In mathematics, a fractal is a detailed, recursive, and infinitely self-similar mathematical set whose Hausdorff dimension strictly exceeds its topological dimension. Fractals are encountered ubiquitously in nature due to their tendency to appear nearly the same at different levels, as is illustrated here in the successively small magnifications of the Mandelbrot set.

The Department of Biomedical Engineering was established in 1968 at Case Western Reserve University, founded on the premise that engineering principles provide an important basis for innovative and unique solutions to a wide range of biomedical and clinical challenges.

Stieltjes, Perron, and Markov in analysis of the moment problem, for absolutely continuous measures, constructed the underlying measure as the discontinuity across the cut of a Cauchy representation of an otherwise real-analytic function.

Quotes. What information consumes is rather obvious: it consumes the attention of its recipients. Hence a

wealth of information creates a poverty of attention, and a need to allocate that attention efficiently among the overabundance of information sources that might consume it.

The jellyroll (or stack of electrodes) of commercial lithium-ion batteries in the current market is a multi-layered structure (see Fig. 2a), and a single repeatable unit consists of a cathode, an anode, and two layers of separator. Further, the cathode is made of an aluminum foil coated on both sides by an active material with a binder.
