### **INTRODUCTION TO GENETIC EPIDEMIOLOGY [M.Tevfik DORAK]**

Genetics is a branch of biology concerned with the study of genes, genetic variation, and heredity in living organisms.. Gregor Mendel, a scientist and Augustinian friar, discovered genetics in the late 19th-century.Mendel studied "trait inheritance", patterns in the way traits are handed down from parents to offspring. He observed that organisms (pea plants) inherit traits by way of discrete ...

1. INTRODUCTION 1.1 A short introduction to Social Network Analysis. A network is made of two components : a list of the actors composing the network, and a list of the relations (the interactions between actors).As part of a mathematical object, actors will then be called vertices (nodes, in Gephi), and relations will be denoted as tiles (edges, in Gephi).

Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits.Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA. ...
