Human Factors in Accidents - Behavior-based safety

Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the (engineering and) design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

Genetics is a branch of biology concerned with the study of genes, genetic variation, and heredity in living organisms.. Gregor Mendel, a scientist and Augustinian friar, discovered genetics in the late 19th-century.Mendel studied "trait inheritance", patterns in the way traits are handed down from parents to offspring. He observed that organisms (pea plants) inherit traits by way of discrete ...
