An Introduction to Robotics and Java Programming

OOP: Introduction 4 The Class Concept A class is a collection of objects (or values) and a corresponding set of methods. A class encapsulates the data representation and makes data access possible at a higher level of abstraction. Example 1: A set of vehicles with operations for starting, stopping, driving, get km/liter, etc.

Introduction to Object-Oriented Programming

Introduction to Programming Using Java

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

Course Ratings are calculated from individual students' ratings and a variety of other signals, like age of rating and reliability, to ensure that they reflect course quality fairly and accurately.

Java Programming for Complete Beginners - Learn in 250

OOP: Introduction 2 Pure Object-Oriented Languages Five rules [Source: Alan Kay]:
• Everything in an object.
• A program is a set of objects telling each other what to do by sending messages.
• Each object has its own memory (made up by other objects).
• Every object has a type.
• All objects of a specific type can receive the same messages. Java breaks some of these rules in the name of ...

Introduction to Object-Oriented Programming

Learn the fundamentals of Java programming language through a variety of online tutorials. These tutorials teach the essential concepts behind building applications using various programming concepts and modules. This site can be used as a practical, example based guide for beginning programmers or those without much Object Oriented programming experience.

Introduction to Java threads - Java programming source code

One of the primary goals of this Java book is to prepare students for the AP test. Another is to prepare for competition...and in the process, learn Java. Over the years, I have seen such competition make a significant difference in the lives of many students. If a teacher is not gentle in this approach to competition you can easily "burn-out" students....especially if you continually bombard ...
