INTRODUCTION TO REAL ANALYSIS - Trinity University

Abstract. These are some notes on introductory real analysis. They cover the properties of the real numbers, sequences and series of real numbers, limits of functions, continuity, differentiability, sequences and series of functions, and Riemann integration. They don't include multi-variable calculus or contain any problem sets.

I often teach the MATH 501-502: Introduction to Real Analysis course at the University of Louisville. The course is intended for a mix of mostly upper-level mathematics majors with a smattering of other students from mathematics, physics and engineering. These are notes I've compiled over the years. They cover the basic ideas of analysis on the real line.
