The metric system was developed during the French Revolution to replace the various measures previously used in France. The metre (sometimes spelled "meter" in American English) is the unit of length in the metric system and was originally based on the dimensions of the earth, as far as it could be measured at the time. The litre (also spelled "liter"), is the unit of volume and was defined as ...

1. Introduction. Transport is the second largest source of energy-related emissions, accounting for 23% in the total energy-related global emissions in 2010 (Sims et al., 2014). Global transport CO₂ (carbon dioxide) emissions are projected to double along with the 170-300% increase in global transport demand by 2050 compared to the 2005 level (). ...
