Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

This book worked great with my class. Very similar to the previous edition so if you need to save money, you could get the older one. It's always recommended that if you've been assigned problems to check out the edition on reserve in your college library just to make sure the numbering hasn't changed.

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.

Thales of Miletus, engineer (c. 624-546 BC) First sage of Greece, he founded classical geometry and natural philosophy. Alchemists have claimed him as one of their own. The theorem of Thales (one of two) is about two triangles with parallel sides: The pyramid's shadow is to the pyramid what a man's shadow is to the man
