Linear Programming Word Problems Worksheet II 1) You need to buy some filing cabinets. You know that Cabinet X costs \$10 per unit, requires six square feet of floor space, and holds eight cubic feet of files. Cabinet Y costs \$20 per unit, requires eight square feet of floor space, and holds twelve cubic feet of files.

imizing a linear function subject to linear constraints .The constraints may be equalities or inequalities. Here is a simple example. Find numbers  $x$  ... Not all linear programming problems are so easily solved. There may be many variables and many constraints. Some variables may be constrained to be nonnegative and

Section 2.1 " Solving Linear Programming Problems There are times when we want to know the maximum or minimum value of a function, subject to certain conditions. An objective function is a linear function in two or more variables that is to be optimized (maximized or minimized).

### **Section 2.1 " Solving Linear Programming Problems**

Linear programming is a mathematical technique for finding optimal solutions to problems that can be expressed using linear equations and inequalities. If a real-world problem can be

### **CHAPTER 11: BASIC LINEAR PROGRAMMING CONCEPTS**

Methods of solving inequalities with two variables, system of linear inequalities with two variables along with linear programming and optimization are used to solve word and application problems where functions such as return, profit, costs, etc., are to be optimized.

1.3 Manipulating a Linear Programming Problem Many linear problems do not initially match the canonical form presented in the introduction, which will be important when we consider the Simplex algorithm.

### **Linear Programming: Theory and Applications**

A problem with this structure is said to be in canonical form. This formulation might appear to be quite limited and restrictive; as we will see later, however, any linear programming problem can be transformed so that it is in canonical form. Thus, the following discussion is valid for linear programs in general.
