High-capacity, post-tensioned anchors have found wide-spread use, originally in initial dam design and construction, and more recently in the strengthening and rehabilitation of concrete dams to meet modern design and safety standards.

Rock engineering design of post-tensioned anchors for dams

A major step in highlighting the significance of tactile sensing technology and its possible applications was taken by Harmon in 1980 with his review .The potential of this technology was further emphasized by two more papers which followed shortly afterwards , .The unavailability of any design criteria was still a major obstacle to progress.

A review of tactile sensing technologies with applications
