Sap is a fluid transported in xylem cells (vessel elements or tracheids) or phloem sieve tube elements of a plant. These cells transport water and nutrients throughout the plant.. Sap is distinct from latex, resin, or cell sap; it is a separate substance, separately produced, and with different components and functions.

Machine learning unlocks the ability to rethink business processes across the company from sourcing and human resources to finance and customer service,? said Noga. ? SAP is committed to making all of our applications intelligent. We began with SAP Cash Application in finance, and now we're expanding machine learning across the entire accounts receivable value chain.
