developerWorks wikis allow groups of people to jointly create and maintain content through contribution and collaboration. Wikis apply the wisdom of crowds to generating information for users interested in a particular subject. You can search all wikis, start a wiki, and view the wikis you own, the wikis you interact with as an editor or reader, and the wikis you follow.

The Java Persistence Query Language (JPQL) is a platform-independent object-oriented query language defined as part of the Java Persistence API (JPA) specification.. JPQL is used to make queries against entities stored in a relational database. It is heavily inspired by SQL, and its queries resemble SQL queries in syntax, but operate against JPA entity objects rather than directly with ...

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.
