AC resonant test system. Testing of certain apparatus requires much high voltage or current that a straight AC test system is not sufficient. Thus resonant test reactor with a variable core is needed.

PowerHV - high voltage test - AC resonant test system

This is the voltage rating given by IS-325 Three phase induction motor Specification but this cannot be

followed in all cases as there have been cases where motors of 150kW being supplied by 415V and 160kW to 4500kW being supplied by 11kV. Now here comes the application of motor in picture & the load torque requirement of the concerned motor.

Basics of 3-phase Induction Motor (part 2)

In the cermet oxide resistors, the internal area contains on ceramic insulation materials. And then a carbon or metal alloy film or layer wrapped around the resistor and then fix it in a ceramic metal (which is known as Cermet).
