PREFACE This is the First Edition of Experiments in Materials Science and Engineering. The principal idea behind this textbook arose from the need to consolidate experimental laboratory procedures

### **Experiments in Materials Science and Engineering**

Recent economic and ecological issues have encouraged the development of new materials with less environmental impact, produced from renewable resources with a high level of biodegradability. Therefore, all over the world, there is rising acceptance in materials demonstrating efficient use of renewable resources.

An engineering bill of materials (EBOM) is a type of bill of materials (BOM) reflecting the product as designed by engineering, referred to as the "as-designed" bill of materials.. The EBOM is not related to modular BOM or configurable BOM (CBOM) concepts, as modular and configurable BOMs are used to reflect selection of items to create saleable end-products.

Advanced composite materials (ACMs) are also known as advanced polymer matrix composites. These are generally characterized or determined by unusually high strength fibres with unusually high stiffness, or modulus of elasticity characteristics, compared to other materials, while bound together by weaker matrices. These are termed advanced composite materials (ACM) in comparison to the composite ...
