Logic models are hypothesized descriptions of the chain of causes and effects (see Causality) leading to an outcome of interest (e.g. prevalence of cardiovascular diseases, annual traffic collision, etc). While they can be in a narrative form, logic model usually take form in a graphical depiction of the "if-then" (causal) relationships between the various elements leading to the outcome.

PivotTables automatically arrange your data in rows and columns. But, if you put in additional headers or manipulate data as you work, things can get dicey. The Recommended PivotTable, a feature introduced in Excel 2013, simplifies this work for you. In this video tutorial, you'll learn all about creating a Recommended PivotTable in order to analyze and effectively summarize your data.

1. Introduction. A data warehouse (DW) is a collection of technologies aimed at enabling the decision maker to make better and faster decisions. Data warehouses differ from operational databases in that they are subject oriented, integrated, time variant, non volatile, summarized, larger, not normalized, and perform OLAP.
