Moon-landing conspiracists focus heavily on NASA photos. They point to oddities in photos and films taken on the Moon. Photography experts (including those unrelated to NASA) answer that the oddities are what one would expect from a real Moon landing, and not what would happen with tweaked or studio imagery.

ABSTRACT. Nanocomposites, a high performance material exhibit unusual property combinations and unique design possibilities. With an estimated annual growth rate of about 25% and fastest demand to be in engineering plastics and elastomers, their potential is so striking that they are useful in several areas ranging from packaging to biomedical applications.
