

mechanical engineering lab equipment pdf

“Mechanical Engineering: Fluids Engineering Lab” In this laboratory, mechanical engineering students perform experiments in fluid mechanics. The subsonic and supersonic wind tunnels as well as the water channel and water table are used for hands-on instruction in laboratory experiments.

Lastly, my thanks go to Mr. S. McCormick for technical assistance, equipment service and upgrading, specimen fabrication, laboratory coordination, and, especially, for overseeing the work of my students during the development of the experiments.

Mechanical Testing of Engineering Materials

Prevention is the key to safety. Prior to designing any experiment, using a new piece of equipment, or handling chemicals in the laboratory, it is wise to consider the potential hazards and safety precautions involved in the work. Hazards may include toxic substances, electrical circuits, mechanical equipment, and waste chemicals.

In Appendix 1 you will find a (incomplete) list of the most important mechanical components. In the next two sections I will show you examples of mechanical equipment that have been built in the laboratories depending on the task that had to be done, i.e. on the properties of the magnet that had to be measured. 6.

SUN LABTEK. Established in 1999, LabTek has built a solid reputation for manufacturing and marketing laboratory equipment with strong mechanical base required in universities, engineering colleges, polytechnics, vocational schools etc. LabTek has a selection of more than 500 mechanical engineering and 800 civil engineering equipments and test rigs.
